

We have included an exciting seaside themed toddler unit offering easy access, sensory panels, talk tubes and a slide! The area also includes a 2-seater sit-in Springer boat and a trampoline!

Toddler area and a structured and developmental Junior play area.

DESIGN SYNOPSIS

A mix of steel, timber, Robinia and HPL materials are proposed that provide synergy to the play areas.

Inclusive items provide support, suitable for a range of ages & abilities, from low level play panels, talk tubes, trampoline, springer, slides & swings.

BALANCE

Additional features such as boulders are included to create social seating or a balancing trail with an inclusive Hoop roundabout, at an ideal transfer height for wheelchairs users.

Consideration is given to nearby residents regarding the height and proximity of play equipment. The design reconnects each area within the existing space and utilises existing landform and gradients.

The design features a Hurricane swing with button seats, different varieties of swings for inclusivity, catering to toddlers and child/parent interactions. Additionally, a thrilling 20m Zip Line and an agility trail with Monkey Bars, provide engaging activities for children.

AGILITY

We have allowed for free play and social seating areas. The addition of sensory play ensures an inclusive environment suitable for all ages and abilities. We use grass mat safety surfacing ensuring a secure and enjoyable space for everyone.

Our offer includes a focal Tower climbing unit with two slides, climbing wall, nets & bridges with sensory features.

SENSORY

INCLUSIVITY
