

Our design for Randolph Lane is suitable for children up to 12+ years of age as set out within the tender documentation. We have included all equipment in your specification as well as keeping it all to one side of the path and within a fenced area.

We have used metal equipment for this site due to the robustness of the equipment and longevity. The equipment will blend in with the natural environment and be easy on the eye for the nearby houses. We chose a unit which is open and transparent, to prevent groups of children from gathering in them and creating a “den” or social nuisance and allowing for clear lines of sight throughout.

Inclusivity and accessibility are considered throughout the site from the accessible stairs on the unit to our inclusive roundabout as well as a basket swing and games and sensory panels. A high level of inclusive options has been provided across the items of play equipment and the design of the play area will allow for high levels of playing together. The park will encourage inclusive play and be suitable for children with additional support needs where possible.

In play design we aim to provide all the key play activities that children love such as climbing, sliding, spinning, balancing, seesawing, challenge, and role/imaginative play opportunities. We have chosen equipment so that children of different age groups, interests and abilities can use this play area flexibly, either individually or with their friends.
