

Logie Park PA

We have used the design brief provided to create a fun play environment for children up to 14 years, locating age-appropriate equipment together.

To bring character and interest for toddler aged children we have included a themed unit, the **Seaside and Sandcastle** play unit. From moving fish, spinning windmill, ramp climber and slide add to the other play opportunities on offer.

A popular item in all play areas is the **Swing**, in our design we have included cradle seats, flat seats and basket/nest, catering for all ages and abilities.

We have incorporated a steel **20m Cableway** with ramp situated within the design to run across the top of the site.

We have proposed an **inclusive roundabout**, accessed from path to a large wet pour rubber area. This unit comes with a scooter frame and bench with plenty space for a wheelchair. We have also included a spinner item, **Space Trainer**; designed for older children, this play unit can have upto three users at any one time.

The main play structure for the 6-14 age group is the **Playzone Two in One**, a two-tower climber with monkey bars, ramp, vertical net, fireman's pole, rope climber and steel slide offers lots of challenge for older children.

Play Trail - We have created a play trail using balance beam, stepping logs, net climber and chin-ups, set in some landscaped mounding the trail will add a new dimension to the other play items.

All equipment is manufactured to EN1176 standards.
